Writing Event-driven Code with EventEmitters

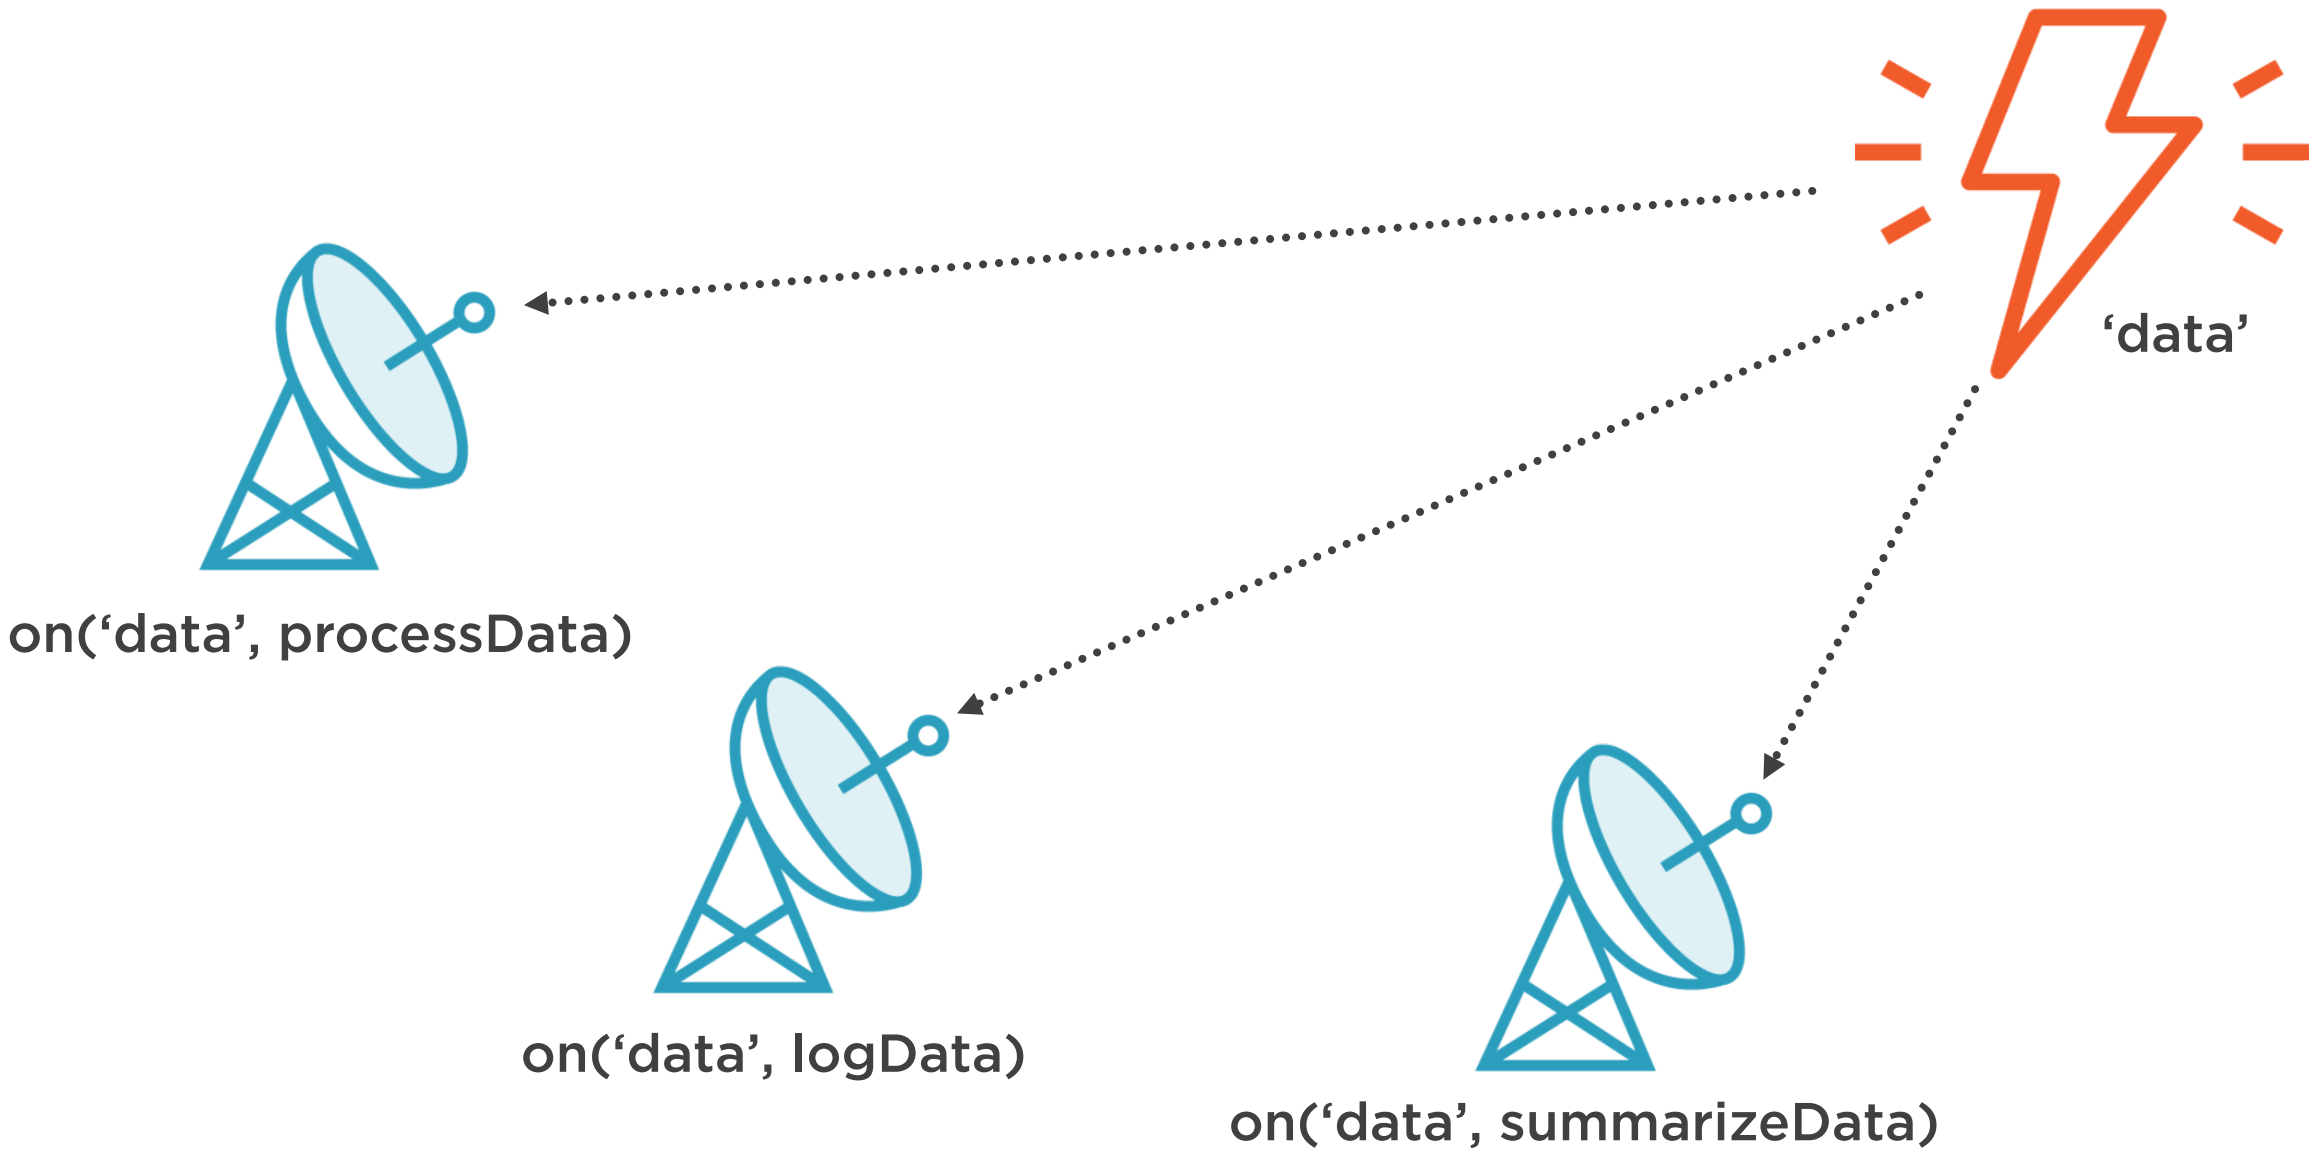

Brice Wilson

@brice_wilson www.BriceWilson.net

“As an asynchronous event-driven runtime, Node.js is designed to build scalable network applications.”

https://nodejs.org/en/about/

EventEmitters

Demo

Creating and responding to events with an EventEmitter

Demo

Configuring event handlers for asynchronous execution

“The EventEmitter calls all listeners synchronously in the order in which they were registered. This ensures the proper sequencing of events and helps avoid race conditions and logic errors.”

https://nodejs.org/docs/latest-v12.x/api/events.html#events_asynchronous_vs_synchronous
